

Miller School Residences Executive Summary

This project includes the renovation of the Historic former Miller School. This adaptive reuse project will convert the building into mixed-income housing. This project will feature 44-units and will include both market rate, affordable housing and amenity spaces. This project is a continuation of Phase 1 which included the development of 36-units of affordable housing units. The project will include an exercise facility, elevator, off-street parking and outdoor living space. We are excited to restore this beauty back to its original glory and incorporate the cultural legacy of the Schools history as well.
